

MATERIALS

Teak is a superior wood for the construction of outdoor furniture. Because of its high oil content it is resistant to rotting, bug infestation, and the effects of wind, rain, sun, and snow. If left untreated, teak weathers naturally to a beautiful silver gray color. Resin Wicker is made of a synthetic polyethylene material. Durable and elastic, resin wicker will resist weathering and endure. Solution-dyed polyester fabric is an economical option available on stocking cushions with the look and feel of cotton and the durability of synthetic fibers.
